

Supporting: MSFKB3005 Fabricate cabinets for the built-in environment

## Practical demonstration checklist

The checklist below sets out the sorts of things your trainer will be looking for when you undertake the practical demonstrations for this unit. Make sure you talk to your trainer or supervisor about any of the details that you don't understand, or aren't ready to demonstrate, before the assessment event is organised. This will give you time to get the hang of the tasks you will need to perform, so that you'll feel more confident when the time comes to be assessed.

When you are able to tick all of the YES boxes below you will be ready to carry out the practical demonstration component of this unit.

General performance evidence	YES
1. Follow all relevant WHS laws and regulations and company policies and procedures	<input type="checkbox"/>
2. Complete or interpret drawings, specifications and customer instructions for the cabinets to be fabricated	<input type="checkbox"/>
3. Select the most suitable construction techniques according to industry standards	<input type="checkbox"/>
4. Plan the construction and assembly sequence, including stages for quality checking	<input type="checkbox"/>
5. Develop a cutting list	<input type="checkbox"/>
6. Select the tools and equipment for the job, carry out all required pre-operational checks and prepare the work area	<input type="checkbox"/>
7. Select the most appropriate materials, components and surface treatments for the project, taking into account industry standards and customer requirements	<input type="checkbox"/>
8. Identify the features, benefits and limitations of the materials and other items selected	<input type="checkbox"/>
9. Cut and form materials using tools and equipment in accordance with manufacturers' guidelines and wearing all appropriate PPE	<input type="checkbox"/>
10. Manufacture cabinets, carrying out quality checks at the required stages and cross-checks with plans and specifications	<input type="checkbox"/>
11. Assemble and fit components, including doors, drawers and shelves, and check alignments and tolerances	<input type="checkbox"/>
12. Clean up work area and dispose of rubbish properly	<input type="checkbox"/>
